SAMPLE

Return Authorization #: 2020-XXX

FROM: Patrick O'Sullivan
DATE: July 8, 2020
SUBJECT: Source Returns

Dear [Contact Name],

This memo is in response to your inquiry about our ability to accept sources for disposal by QSA Global back into the United States. We can accept any radioactive material (RAM) in the form of sealed sources for recycle/disposal that is listed on our RAM license and meets QSA Global and the US Import requirements for RAM. You must still follow our procedures for source approvals. QSA Global will accept no sources until all of the required source information has been reviewed. All sources will be approved using our standard Source Disposal Inquiry Forms or equivalent information supplied by your company. The sources you have approval to return to at this time are listed below along with any additional conditions listed.

| Isotope | Activity | Device | S/N |
|---------|----------|------------------|--------|
| Cs-137 | 100 mCi | Vega Model SH-LD | 9999GG |

Any shipping charges will be additional. Please contact me if you or anyone else should require addition information regarding this matter.

Thanks,

Patrick O'Sullivan
